Profile Summary

Full Stack Developer with hands-on experience building scalable web applications using React, Next.js, FastAPI, Node.js, PostgreSQL, and MongoDB. Skilled in designing REST APIs, integrating AI services, containerizing applications with Docker, and deploying production-ready solutions on cloud platforms. Strong foundation in Data Structures, DBMS, OOP, Operating Systems, and Computer Networks.

Education

B.Tech in Computer Science and Engineering KCC Institute of Technology and Management (AKTU)	09/2022 – 06/2026 CGPA: 7.5
Senior Secondary (XII) Don Bosco Academy	2020 – 2022
High School (X) Red Carpet High School	2018 – 2020

Projects

PathWise – AI Interview & Career Navigator (Team Project) GitHub Live Demo	10/2025 – Present
- Architected and developed a responsive frontend using React (Vite) and Tailwind CSS, improving user interaction and accessibility. - Implemented backend REST APIs with Node.js and Express.js, enhancing data flow and system scalability. - Integrated OpenAI GPT models to deliver AI-driven mock interviews and personalized career roadmaps. - Collaborated with team members to design secure authentication using JWT and Google OAuth with MongoDB storage.	
Inventra – SaaS Inventory & Order Management Platform GitHub Live Demo	05/2026 – 06/2026
- Built a production-ready full-stack inventory management platform using React, FastAPI, PostgreSQL, and Docker. - Developed a transactional order engine with automated stock validation, dynamic pricing, inventory synchronization, and stock restoration on order cancellation. - Implemented secure authentication using JWT and Google OAuth 2.0, enabling protected routes and seamless user onboarding. - Containerized the complete application using Docker Compose, orchestrating frontend, backend, and PostgreSQL services with persistent storage volumes. - Deployed the frontend on Vercel and backend on Render, with integrated Swagger/OpenAPI documentation for API testing and developer productivity.	
Synapse.hr – AI Mock Interview Platform GitHub Website	06/2025 – 07/2025
- Designed and built a modern AI-powered mock interview platform simulating real interview environments. - Developed responsive UI using Next.js and Tailwind CSS, enhancing user experience and engagement. - Integrated Vapi AI for voice-based interviews, enabling real-time feedback and transcript generation. - Deployed cloud-based backend using Firebase, improving application reliability and scalability.	

Technical Skills

Languages & Frameworks: React.js, Next.js, Node.js, Express.js, FastAPI, TypeScript, JavaScript, Python, Java (JSP, Servlets), Tailwind CSS, HTML5, CSS3

Databases & Cloud Platform: PostgreSQL, MongoDB, MySQL, SQL, Docker, Docker Compose, Firebase, Render, Vercel

Tools, AI & Core CS: Git, GitHub, Postman, JWT, OpenAI API, Vapi AI, Data Structures & Algorithms, OOP, DBMS, OS, Computer Networks

Certifications

- Java Web Development with AI – HCL Technologies
